

How to Extend Your Eyelashes

I feel envious whenever I see celebrities have their own thick and long eyelashes. I feel that their eyelashes are so beautiful and gorgeous. Seriously, I also want to have it too. Therefore, today I shall teach you girls how to apply false eyelashes to create the celebrity outlook.

Bear in mind that the glue will not stick if your eyes are too oily. Therefore first and foremost, you should always make sure that your eyes are free from oil. This step is to ensure that eye lashes will stick longer on your eyes.

Before we wear false lashes, make sure to apply some eyeliner and mascara. This will help you to create the base for the false lashes.

Normally most false eyelashes will need to be trimmed to match your desired length, using a small pair of scissors.

Next, now you can apply glue on the false lashes and wait for few seconds. Then, look at the mirror and use the tweezers to push down the false lashes from the inner corner to the outer corner of your eye. Try to get as close to your real lashes as possible.

Once you are done with fixing the false lashes, apply more eyeliner above the false lashes line in order to blend and hide the base. Don't forget to put more mascara too on the area too.
